

LED Driver

# Driver Universal voltage (120–277 V)

Highest flexibility

# TRIDONIC

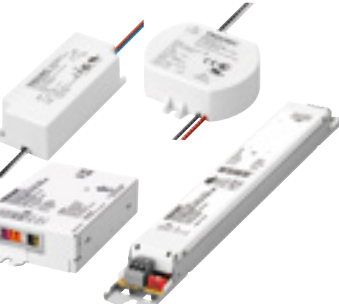

# Universal voltage

## Highest flexibility

Positioning in the Tridonic portfolio

essence (SNC)	advanced (ADV)	excite (EXC)	premium (PRE)
Cost-effective	Simplicity itself	Flexible	IoT integration application

Overview of casing types

Compact, Built-in	Linear Low Profile, Built-in	Linear Profile, Independent/Built-in	Low Profile, Built-in
			
For spot- and downlights, floor-wall luminaires	For spot- and downlights, floor-wall luminaires	Constant Voltage (12/24 V) driver especially designed for flex modules and signage lighting.	Added lighting system value with automated dimming / lighting controls via Enlighted Sensor Interface.

emergency (EM)
LED Emergency Control Gear

For emergency situations.

**LED Driver series for universal input voltage**  
Thanks to its in-depth know-how, many years of experience and a high level of innovation, Tridonic is heavily involved in the optimisation of lighting components and the preparation of specific standards. With the introduction of the Universal Voltage series of drivers (120–277 V), the company once again confirms its position as a global industry leader.

# Driver premium (PRE) low profile, SMI, UNV Interface

## Linear fixed current dimmable driver

At a glance:  
**Driver premium (PRE) IOT**  
**Universal Voltage, Smart Module Interface**

- Constant current LED Driver
- Dimming range 1 – 100 %
- Adjustable output current between 300 and 1,050 mA via I-SELECT 2 plug
- Dimmable via Smart Module Interface (SMI)
- Added energy savings with dimming via Enlighted Sensor Interface
- Class 2 sensor supply, FCC Part 15 Class A
- Warranty 5 years
- Lifetime 100,000 hours
- Intelligent Temperature protection

Driver IoT PRE UNV

### Driver premium (PRE) | low profile (Ip), smart module interface, Universal voltage 100–277 V

## Surge protection device

## At a glance: Surge protection device (SPD)

- Universal use for street, tunnel or object lighting
- Flexible installation (on plate)
- Compact design
- UL 1449 type 5 (safety standard)
- IEEE C62.41.2 2002 (performance standard)
- Type of protection IP67
- Warranty 5 years

The surge protection device (SPD) is particularly suitable for the North American market and offers the driver technology additional protection against overvoltage of above 10 kV and 20 kV. The device is installed upstream from the driver and prevents the high-quality technology from being damaged – in the event of a lightning strike, for example. With IP67 protection rating and an extremely wide ambient temperature range, it also offers outstanding protection in challenging environments.

Designation	Surge/Burst protection	Size (mm)	Order No.
SPD 10kV UNV SNC	10 kV	90 x 26 x 17	28002169
SPD 20kV UNV SNC*	20 kV	100 x 30 x 20	28002170

\*soon available. Further details can be found in datasheet.

# 24 V Constant Voltage, Universal voltage

## Non-dimmable

At a glance:  
**Driver Linear Strain-relief, Independent 24V EXC**

- Constant-voltage LED Driver 24 V
- Universal voltage input 90–305 V
- Non Dimmable unless paired with dimming module
- Low Profile Design to adapt to various applications
- Housing Type: Linear Profile
- Casing Type: plastic, white
- Warranty 5 years
- Lifetime 50,000 hours
- Intelligent Temperature protection

Driver excite (EXC) | Linear Profile, Independent (SR), Universal voltage 90–305 V

## Driver Linear 48 V DC-String

- Independent fixed output
- Universal voltage input 120 – 277 V
- Casing Ip: metal, white, Built-in solution
- Warranty 5 years
- Lifetime 50,000 hours
- Intelligent Temperature protection

Bridge 0-10 V PLC

At a glance:

## Bridge 0-10V PLC

- Bridge for converting analogue signals into PLC for DC-String dimming
- For connecting dimmable DC-String LMI LED Driver in 0-10 V control systems
- For a maximum of 20 DC-String LMI LED Driver
- Casing types: polycarbonate, white

## Driver 48 V DC-String | Linear Low Profile

Designation	Output current at full load (mA)	Output voltage range (V)	Output power (W)	SELV 60 V	Input voltage (V)	Size (mm)	Order No.
LC 48V 100W DC-STR UNV FO Ip	383	48	100	yes	120-277	425 x 30 x 22	28001983
BRIDGE 0-10V PLC DC STR						30 x 21 x 120	28002074

# Prepared for the future

## Our activities and locations

1,932

Around 1,900 employees throughout the world are committed to helping you with their know-how and creativity to create the perfect light.

6

There are six research and development centres in which new LEDs and net-worked lighting technologies are being developed.

3

There are three things you can rely on at Tridonic: optimum product quality, decades of expertise and our committed and flexible support.

1

In our unique software competence center in Porto (Portugal), information technology experts are developing new solutions for smart buildings and smart cities. They are working on a range of products from intelligent lighting management and control systems to highly advanced IoT solutions and their matching digital services.

21

With 21 branch offices on five continents we are there for you wherever you are in the world.

2,600

That's how many patents and inventions testify to Tridonic's extraordinary powers of innovation.

### Details

# Emergency back-up drivers: EM converterLED ST

## SELFTEST series

Emergency back-up drivers:

**EM converterLED**

- Emergency lighting LED Driver with self-test function
- Battery pack enclosed
- For self-contained emergency lighting
- For LED modules with a forward voltage up to 60 V
- Class 2
- Warranty 5 years
- Lifetime 50,000 hours

**EM converterLED ST**

Designition	Output power (W)	Mains voltage (V)	LED module forward voltage range (V)	Mains current in charging operation			Rated power in charging operation			Size (inch)	Order No.
				Initial charge (mA)	Fast charge (mA)	Trickle charge (mA)	Initial charge (W)	Fast charge (W)	Trickle charge (W)		
EM converterLED ST 1-9-5 60V UNV*	5	120	13 – 60	90	90	75	2.0	1.0	1.0	4.92 x 4.61 x 2.56	28002863
		277		119			1.1	0.9	0.9		
EM converterLED ST 1-9-9 60V UNV*	9	120	14 – 60	153	115	105	2.0	1.4	1.3		28002866
		277					1.5				
EM converterLED ST 1-9-15 60V UNV*	15	120	15 – 60	210	190	190	2.2	2.3	2.4		28002869
		277									

\*available Q2/2019. Depending on the selected output current. Further details can be found in datasheet.

# Emergency back-up drivers: EM converterPACK

## SELFTEST series

Emergency back-up drivers:

### EM converterPACK

- Emergency lighting LED Driver with self-test function
- For LED modules with a forward voltage up to 60 V
- For self-contained emergency lighting
- Class 2
- Battery pack enclosed (EM converterPACK)
- Compatible with most constant current LED Drivers
- Automatic shutdown of output if LED load is out of range
- 90 minutes rated duration
- Warranty 5 years
- Lifetime 50,000 hours

EM converterPACK ST 60 V UNV COND\*

### EM converterPACK

# Lighting management systems

Light at the right place, at the right time

## basicDIM Wireless system

### The intuitive move toward wireless luminaire communication

As technology moves toward controlling and dimming lights, Tridonic's fully intuitive basicDIM Wireless technology makes it possible to update conventional lighting without committing to additional construction. By grouping luminaires and creating light settings, lighting professionals can control up to 127 light points with on and off switching, as well as dimming, all through Bluetooth, all through an APP.

## basicDIM Wireless Sensor (Casambi Ready)

The basicDIM Wireless Sensor 5DP 38RC is the ideal addition to the basicDIM Wireless series of products as it offers daylight-dependent lighting control and presence detection. It has been designed for the following principal applications:

- Open-plan offices
- Training / presentation rooms
- Corridors, passageways and garages

## basicDIM Wireless modules (Casambi Ready)

### Wireless modules for constant voltage and constant current dimming

The basicDIM Wireless module integrated into the luminaire allows convenient, wireless interaction with luminaires, including configuration as well as commissioning and actual use. Easy control via Bluetooth is already visible on the compact user interface. The lighting control system can also be operated via the 4remote BT App.

- Wireless controllable with a Android / iOS smart device
- Automatically forms a wireless communication network with up to 127 nodes
- 2 channel 0–10 V dimming (bDW 0-10V 2 CH)
- 4 PWM outputs (bDW module PWM CV 4CH)
- Easily implemented RGB and color temperature controls
- Warranty 5 years
- Lifetime 50,000 hours

basicDIM Wireless  
0-10 V 2CH

basicDIM Wireless  
module PWM CV 4CH

### Options for use of basicDIM Wireless

#### Selection of settings

Saved settings can be accessed quickly and adjusted to the planned room usage

#### Color temperature

The light shade can be adjusted individually in accordance with the luminaires used

#### Dimming options

between 1% and 100%

#### Presence detection

Light to suit requirements through integration of sensors

#### Scheduling

Scheduling possible using internal clock and calendar

#### Customisation

Adjustments for changes to usage requirements or for system expansion

#### Group circuit system

Control for individual luminaires and groups adjustable to usage requirements at any time via the 4remote BT App. Simple subsequent expansions through wireless installation

### Ordering data

basicDIM Wireless User Interface	28002213
basicDIM Wireless User Interface white	28002420

# Lighting management systems

## Light at the right place, at the right time

Perfect light and high efficiency go hand in hand with Tridonic. This is demonstrated by the broad range of LED solutions which form an essential basis for energy-efficient lighting systems. As well as switching to LED technology, a dimming function also plays a particular role in sustainably improving the balance of energy. Tridonic also lives up to its status as an expert here – with a compatible portfolio of sensors to complement the driver technology step by step.

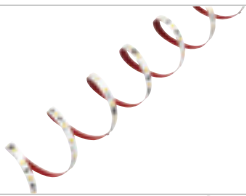

At a glance:  
**basicDIM ILD 5DPI 19F 0-10 V**

- Compact dimensions for luminaire installation
- Connect up to 1,200 W or 400 VA load
- 0–10 V output
- PIR sensor with ambient light dependent control and motion detection
- Bright-out function: luminaire is not switched on if there is adequate brightness
- Switch input for on/off switching and dimming
- Connection of multiple switches possible
- Individual adjustment of multiple parameters with basicDIM ILD 0-10V Programmer
- Warranty 5 years
- Lifetime 50,000 hours

The UL-certified Low-Bay Sensor combines daylight and motion sensors in a highly compact enclosure. The multi-sensor is a perfect supplement to the driver portfolio and is the optimum solution for smaller office applications. It is fitted with switch and dimming functions. There is also the option of controlling the light via a wall switch. The basicDIM ILD is also available with an infrared sensor as an option.

Type	Size (mm)	Order No.
basicDIM ILD 5DPI 19F 0-10V	120 x 30 x 21 30 x 25.8	28001980
basicDIM ILD 0-10V Programmer	130 x 56 x 15	28001981
